Hunger is Unacceptable.

Through Canstruction®, our local design community is doing its part to help create a solution to the problem. Teams of architects, engineers, contractors and college students compete to design and build giant structures made entirely from full cans of food. After the competition and display, all food is then donated to the Freestore Foodbank.

Canstruction® is a not-for-profit foundation of the Society for Design Administration whose mission is "One Man Can (make a difference against hunger)."
